Career Objective

Front-end web developer with ten plus years of experience. I care about excellence and have a knack for minding the fine details. While HTML and CSS are my primary strengths, I'm also a strong communicator both verbally and digitally and can work between multiple teams to accomplish complicated problems utilizing technology. I am interested in a Full time, hybrid to remote position that will allow me to continue to hone my skills and make an impact beyond myself for the greater whole.

Experience

May 2020 – Mar 2025
Front-End Web Developer | Mission Pre-Born | Indy, IN & Remote Hybrid

- Assisted in launching, maintaining, and releasing new features for over twenty websites.
- Took web designs from digital asset to responsive, accessible and SEO friendly code.
- Integrated Google Maps JS into a Vue.js and Laravel project to allow users to search and select various partner locations as a visual map component.
- Triaged tech requests from five different departments, ranging from basic IT requests to new feature requests and bugs as the tech team project manager.
- Planned and initiated sixty plus tech team sprints and helped facilitate the completion of hundreds of tasks.
- Wrote documentation, new policies, and standard operating procedures to ensure quality assurance.
- Launched new giving processor that transitioned donor base of over 216,000 to a better user experience.

Jul 2017 – Apr 2020
Front-End Web Developer | Lippert Components | Elkhart, IN & Remote Hybrid

- Worked my way from independent contractor to fulltime front-end web developer and scrum master for agile team of four developers.
- Assisted in launching, maintaining, and creating new features for over 10 websites.
- Using provided 3D rendered images and CSS, customized a sports boat trailer configurator with very little access to backend code base.
- Crafted webpages from design to responsive, accessible and SEO friendly code. Sometimes taking only copy and building wireframes into pages with little to no direction.
- Collaborated with cross departmental team of developers to write, push and review code via GIT version control software to ensure quality and consistency in code base.
- Utilizing Google Tag Manager and Google Analytics, gathered and organized all company and subsidiary website marketing pixels and accounts under one company umbrella account.
